Include (Type: Boolean, Pattern: False, optional) - Should roll the style of "hidden" being considered. Template-URL (Pattern: Ub / Model / Accordion / Accordion-Group.html) - Add the ability to replace the model used in the component. Right: element right, vertically focused on the host element. Angular.Element (\$ document [0].QuerySelector ('.Modal-demo' + pandelector)); Indefinite; var modalinstance = \$uibmodal.open ({animation: \$Ctrl.AnimationSenabled, AriaLabelledBy: 'Modal-title, ARIADESCREDBY: 'Modal-Body', modalcontent.html', controller: 'ModalInstanceCtrl', Controlleras: '\$ Ctrl', Size: Size, Append: Parentelem, Solve: {Items: Function () {Return \$ Ctrl.Items}}}); modalinstance.result.then (function (selectedItem) { \$ Ctrl.Selected = SelectedItem; }, Function () { \$ log.info ('Modal dismissed in: ' + new date ()); }); }; \$ Ctrl.OpencomponentModal = Function () (var ModalInstance = \$ UIBModal.Open ({Animation: \$ Ctrl.AnimationSenabled, Component: 'ModalComponent', Solve: {Items: Function () {Return \$ Ctrl.Items}}}); ModalInstance.Result.Then (Function (SelectedItem) { \$ Ctrl.Selected = SelectedItem; }, Function () { \$ log.info ('Modal component dismissed in: ' + new date ()); }); }; \$ Ctrl.OpenMultiplemodals = Function () (\$ UIBModal.Open ({Animation: \$ Ctrl.AnimationSenabled, AriaLabelledBy: 'Modal-title-Bottom', Ariadescribedby: 'Modal-Buffer', Model: 'StackedModal.html', size: 'SM', controller: Function (\$ scope) { \$ scope.name = 'Bottom'; }); }; \$ UIBModal.Open ({Animation: \$ Ctrl.AnimationSenabled, AriaLabelledBy: 'Modal-title-top, AriaScriptedby: 'Modal-Body-top', Model: 'StackedModal.html', Size: 'SM', Controller: Fun (\$ Scope) { \$ scope.name = 'top'; }); }; \$ Ctrl.ToggleAnimation = FUNCTION () (\$ Ctrl.AnimationSenabled;);); // Please note that \$ UIBModalInstance represents a dependence on the modal window (instance). False) - Be to show Popover: ** You can also support FullDate | Longdate | Medium | Medium | MCH | Short | Shortdate | Range of time as the format to analyze. Height (Type: Number) - The height of the element. Typeahead-select-on-blur \$ (pattern: false) - No Blur, select the currently highlighted game. Tooltip-popup-close-delay C (Pattern: 0, Config: PopUpClosedelay) - How long will the tooltip remain open after the trigger close event? s (Example: 22) - Analyzes the seconds. Options Animation of parameters (Type: Boolean, Pattern: True) - Set as false to disable animations in the new modal / Cenario. Returning the All Open Returns a Modal Instance, an object with the following properties: Close (result) (Type: Function) - Can be used to close a modal, passing a result. Note for Mobile Developers: Note that although tool tips can work correctly on mobile devices (including tablets), we make the decision not officially support this use case because it does not make sense of a perspective Ux. .typeahead-demo .Custom-popup-wrapper {Position: Absolute; The 100 best%; Left: 0; Z-index: 1000; Show none; Color background: # F9F9F9; } .typeahead-demo .Custom-popup-wrapper .Message (Fill: 10px 20px; Border-Bottom: 1px Sólido #DDD; Color: # 868686; } .typeahead-demo .Custom-popup-wrapper > .DropDown-Menu (Position: Statics; Float: none; View: Block; Minimum width: 160px; Color Background: Transparent; Border: none; Border radius: 0; Box-Shadow: None; } Statistics Model: { { selected | JSON } } Astronos results Model: { {AsyncSelected | JSON} } HTML POPOVER HTML Popover (Inline) angular.module ('ui.bootstrap.demo'). Controller ('Popoverdemoctrl', Function (\$ Scope, \$ SCE) { \$ SCOPE.DYNAMICPOVER = {Content: 'Olá, World!', Mododurl: 'MyPopoverTemplate.html', title: 'Tactile'}; \$ Scope.Placement = {Options: ['top', 'top-left', 'top', 'Bottom-Left', 'Bottom-Right', 'Left', 'Left-Top', 'Bottom's Left', 'Right', 'Top to Right', 'Bottom'], Selected: 'top'; \$ scope.htmlpopover = \$ SCE.Trustashtml ('I can have html ""); }); The \$ ubosition service provides a set of used git utilities - à € - internally to position the absolute position an element The other element (Tools, Popovers, Dicaheads etc ...). 'Open \$ (pattern: false) - If the Accordion group is opened or closed. This is why we need to remove the empty href attributes of models and how a result style is not applied correctly. M (Example: 3) - Analyzes the minutes. This is due to Bootstrap CSS style. NG-Model \$ - the date object. All radio buttons in a group must use the same NG model. Typeahead-no-outcomes \$ (pattern: angular.noop) - Connection to a variable that indicates if no corresponding results was found. UIB-Popover-HTML \$ - takes an expression that evaluates into an HTML string. Positioning (element, placement) Positions the arrow elements of the tooltip and popover when using the top-of-the-top, left, bottom or right . Angular also provides the following keywords reserved to get the first and last items in the array. D (Example: 5) - Analyze a day in a rich day. SS (Example: 08, leading 0) Analyzes the seconds. Enter / Space: Select date. NOS SIMPL We need to define a Trackby method, which needs to identify each element exclusively on the associated component and assign it to the Directive as follows: Import (component) of '@ angular / node'. @Component ({selector: 'Movies-list of app-movies', model: ` `}) Moveelisticomponent export (moviesRR: any []) = [({ID: '1', "title": "Super Man"}, {"ID": 2, "Tapulum": "Spider-Man"}, {"ID": 3 "Title": "Aladdin"}, {"ID": 4, "Title": "Downton Abbey"}]); TrackByMethod (Number: Number, EL: any): Number (return el.id; }) We can simply identify each element in an unique way using your ID. MÃs - In this mode, you can select a month within a selected year. Notes If the date on which a user between falls out of the Min- / Max-Date range, a dated validation error will be displayed in the form. By true or false pattern. Readonly - This setting is readonly. Horizontal \$ - an optional attribute that allows collapsing horizontally. Along with the 'auto' indicator, the supported placing chains are: Top: Element at the top, horizontally focused on the host element. Top (type: number) - distance to the top edge of viewport. Tags The last triggers are supported outside the box, along with their hidebill triggers provided: MouseEnter: Mouseleave Click: Click Outsideclick: Outsideclick Focus: Blur None The OUTSIDECLICK Trigger will handle the click and tip Occult when anything else is clicked. This directive is composed of three parts: Dropdown UIB that transforms a node into a drop-down list. The result should be passed in this format: { \$ VALUE. MyRejectedResult } ModalInstance - The modal instance. slide ({slide.id}) { {slide.text}} link 1 Some contents switch collapses horizontally Some contest angular.module ('ui.bootstrap.demo'). Controller ('collapsedemoctrl', function (\$ scope) { \$ scope.isnavcollapsed = true; \$ scope.Envolved = false; \$ scope.entrandoreHorizontal = false; }); the UbDateParser is used internally to analyze the dates. Left (Type: Number) - The value of the left. You can manually control it with is open. Default-URL (Pattern: Ub / Model / Tabs / tabset.html) - A URL representing the location of Model to use for the main component. If the promise returned is rejected, the collapse will be canceled. pager You are currently on the page ({currentpage}) angular.module ('ui.bootstrap.demo'). controller ('pagerdemoctrl', function (\$ scope) { \$ scope.totalitems = 64; \$ scope.currentpage = 4; }); A lightweight and extensible directive for the fancy popover creation. Exception being milliseconds that require values below 100. Commented (Type: Date, Example: New Date ()) - If you want to analyze a date, but keep the time spindle, you can pass an existing date on here. Tooltip-class - custom class to be applied to tooltip tip. 0.14.3 It is the last version of this library that supports angularjs 1.3.x and 0.12.0 is the last version that supports angularjs 1.2.x. Angle-Animate (the version must match your angular. tested with 1.6.1) if you plan to use animations, you also need to carry angular.animations. Previous text C (Pattern: «Previous» - text for the previous button. Returns (Type: Number) - The value of style property. Left top - Popover at the top, the left edge lined with the left host element. Keyboard - (Type: Boolean, Pattern: true) - Indicates whether the dialog box should be closed, hitting the Esc key. It should be unique. Angular.module ('ui.bootstrap.demo'). Component ('ModalComponent', {mododurl: 'MyModalContent.html', connections: {resolves: '}, Keyboard support depending on the current DatePicker mode, the date may refer to day, mothers or year. If the compile is required, use the UB-Tooltip-Template attribute option. The right and bottom dimensions represent the distance to the respective edge of the viewport element, not the upper and left edge. Rendered (type: promise) - is solved when a modal is rendered. CLASSES OF CONFIGURATIONS OF THE UB \$ - APTIONAL SEQUENCE OF CSS Classes Separated by Space. Bottom: Right element, bottom edge lined with lower border of the host element. OpenedClass (Type: String, Pattern: Modal-Open) - Class added to the body element when the modal is open. In addition, some configurations have a distinctive in it - This configuration has a \$ clock listener applied to it. If you are using the component option, see details on how to access this object in the component section of the modal documentation. To replace you must provide an array as ['Am', 'PM']. Returns (Enter: Number) - The width of the browser scroll bar. Typically, this will be the text in your modal, but it does not include something that the user would interact, like buttons or a form. Supports no \$ template event for expression. In addition, the all \$ close and \$ dispensing return true if the event was executed. The body of the UIB accordion group grows to fit the content template of the contest with the Custom Header Model World, to delete your account, click the button below that I can use a marking tag. © M! This is just a content to illustrate extravagant. Z (Example: -0800) - analyzes the time spindle displacement in a signed representation of 4 Digital WW (Example: 03, Leadership 0) - Analizes the Number of Week Week (Example: 03) - Analias of the Number Week G, GG, GGG (Example: AD) - analyzes the era (AD or BC) GGGG (Example: Anno Domini) - analyzes the long form of era (Anno Domini or before Christ) * Those marked with Leadership 0, need a leading 0 for values below 10. Returns an array with the following values: [0] (Type: String) - The primary positioning. This attribute requires the presence of the Close attribute. angular.module ('ui.bootstrap.demo'). Controller ('carouseldemoctrl', function (~ scope) { \$ scope.myinterval = 5000; \$ 5000.noslides = false \$ scope.active = 0; var slides = \$ scope.slides = []; = 0; \$ Scope.Addslide = Function () {var Newwidth = 600 + slides.length + 1; slides.push ({{Á - Image: '/unsplash.it/ + NEWWIDTH + / 300', text: 'I good image', 'impressive photography', 'that is so cool', 'I love this'} | slides.length % 4). ID: Curindex + ++}); \$ Scope.Randomize = Function () {var indexes = generateIndexArray (); cedarerwindexestoslides (ranges); }; to (var I = 0; I 'head ACORDEIRE-ACORDEION NG-CLASS = "{Text-mutilated: ISDISABLED} } {{{{{{{{{({} {} UIB Collapse = "I Isopen" > outra aÃsÃo outra coisa aqui link separado type = "text / ng-template" ID = "Dropdown.html" > Get values Demonstration element div> OffsetParent: {{(elemvals.offsetparent)} {{(elemvals.offsetparent)} {{(elemvals.offsetparent)} {{(elemvals.offsetparent)} {{(elemvals.scrollparent)}} ScrollBarWidth: ScrollBarWidth: PosiÃsÃo: {{(ELEVALS.POSIÃAO)}} deslocaemento: {{(elemvals.offset)}} viewportOffset: {{(elemvals.ViewportOffset)}} positioneents: {{(elemvals.positionelements)}} angular.module ('ui.bootstrap.demo'). Controlador ('posiÃsÃoDemoctrl', funÃsÃo (\$ escopo, \$ janela, \$ ubosition) { \$ scope.elemvals = {}; \$ scope.parentscrollable = true; ~ scope.parentrelative = true; \$ scope.getValues ââ = funÃsÃo () {var Dive = \$ window.Document.Queryselector ('# posidemobtn'); var btneL = \$ window.document.Queryselector ('# posidemobtn'); var offsetParent = \$ ubosition.offsetParent (Dive); \$ scope.Elemvals.offsetparent = 'Tipo:' + offsetParent.tagName + ', id:' + offsetParent.id; var scrollparent = \$ ubposiÃsÃo.scrollparent (dive); \$ escopo.Elemvals.scrollparent = 'Tipo:' + scrollparent.tagName + ', id:' + scrollparent.id; \$ scope.scrollbarwidth = \$ ubposition.scrollbarwidth (); \$ scope.Elemvals.Position = \$ ubposition.Position (Dive); \$ Scope.Elemvals.ViewportOffset = \$ ubposiÃsÃo.ViewportOffset (Dive); \$ scope.Elemvals.positionElements = \$ ubposiÃsÃo.Posicionais (BTNEL, Dive, 'Auto Bottom-Left'); }); {{(Dynamic)}} / {{(MAX)}} Sem AnimaÃsÃo {{(Dynamic)}}% de objeto (Tipo de alteraÃsÃo com base no valor) {{(type)}} !!! AtenÃsÃo !!! {{(BAR.VALUE)}} % Uma diretiva de barra de progresso que estÃ focada no fornecimento de feedback sobre o progresso de um fluxo de trabalho ou aÃsÃo. ConfiguraÃsÃo adicionais UIButtonConfig ActiveClass (padrÃo: ativo) - Classe para aplicar aos botÃes marcados. Elemento de parÃmetros (tipo: elemento) - o elemento para obter o ancestral rolÃvel mais prÃximo. classe popular - classe personalizada a ser aplicada Ã poppodo. O escopo associado ao conteÃdo do modal Ã aumentado com: \$ fechar (resultado) (tipo: funÃsÃo) - um mÃto do que pode ser usado para fechar um modal, passando um resultado. [1] (Tipo: String) - A colocaÃsÃo secundÃria. Ano de C (Pattern: 5) - Number of columns displayed in the selection of the year. Usedocument. Usedocument. Boolean, Pattern: False, optional) - If the viewport are the document element instead of the first rollable element. The CSS of the original CSS bootstrap depends on empty attributes of HREF to style cursors for several components (page, guides etc.). INCLUDARGINS (Type: Boolean, Pattern: False, optional) - Margins should be accounted for. This event also includes a parameter for the result / motif and a Boolean that indicates whether the modal is being closed (true) or fired. Concept of Function TWBS MedicesCollbar () in Modal.js. Toolp * Ub- ** All these settings are available for three types of tool tips. For example: click on me for safari (potentially all versions to 9), there is a problem with the hover selector CSS when using several grouped elements next to each other that are using the tooltip tip - it is possible that several elements obtain the state of hover when mousing between The elements quickly and get out of the container at the right time. If the template value is updated (i.e. via data.prototype.setdate), you must update the value of the model breaking the reference by ModelValue = New Date (ModelValue) to have the timepicker update. Dropdown in the body Action another action Anything else here Separate link Action another action anything here Separate link Append-a vs. Services can be configured in a .config function, for example. For policies, we list the different attributes with their standard values. Numbers C (Pattern: 4) - Number of rows displayed in the year's selection. The Public API for the DateParser is a single method called Anal. The first page is 1. We use the ng directive to iterate on the movie matrix and display the title of each movie. Check all the formats supported below. See Router UI resolves for details. Readonly-input \$ C (Pattern: False) - If the user can type within hours and minutes of entry. Right - tooltip to the right, vertically focused on the host element. Aaay (Example: 2015) - analyzes a year of 4 dips. C - This configuration can be configured globally in a constant service *. Now click outside ... "Tooltip-trigger = "focus" "Tooltip-catip = " class = "class = " form-control "/> Disable tooltips conditionally: {{(dynamic)}} % Value-Based Type)
